

**Great Basin Priority Summary - Based on Most Recent 209's
7/7/21**

Priority	Unit ID	Incident	Suppression Strategy	Descriptive Location	Size	24 hr Change	% Ctn	Expected Ctn Date	Complexity / IC Name	Crews		Helicopters			Total # Persons	Critical Needs	Threats
										T-1	T-2IA or 2	T-1	T-2	T-3			
New and Emerging Initial Attack Incidents																	
	UT-SCS	Willow Creek	Full Suppression	7 mi ENE of Redmond, UT	25	NEW			IC Glen Chappell								
Ongoing Large Fires – Prioritized for Resource Commitment																	
	NV-HTF	East Fork	Full Suppression	14 mi S of Gardnerville , NV	1,136	0	90%	7/11/21	Type 3 IC Stacy Saucedo	4	2	0	2	3	229	Maintain current crew and aviation resources	Scossa Canyon dwellings and outbuildings
Ongoing Long Duration Fires – Not Being Prioritized for Resource Commitment																	
	ID-SCF	Fritzer (weekly update)	Monitor (25%) Full Suppression (75%)	15 mi NE of Salmon, ID	137	0	75%	7/4/21	Type 5 IC Balliett	0	0	0	0	0	15	None	
Notes of Significance *** Fires highlighted in yellow have submitted a FINAL ICS-209 or will no longer meet criteria to be prioritized																	
	UT-FIF	Monk Springs	Full Suppression	5.5 mi SE of Kanosh, UT	170	0	100%		Type 4 IC Kylie Stott	0	1	0	0	0	24	None	None
	NV-HTF	Pan	Full Suppression	11 mi N of Bridgeport, CA	40	0	80%		Type 4 IC Matt Brown	0	1	0	0	1	49		

Evening Brief

Date: July 7th, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light-Moderate Initial Attack Activity
National	PL 4	New Fires and Acres: 19 fires for 33.75 acres / 0 acres Large Fire Growth

Weather Summary:

Gusty winds developed across the northern Great Basin on Wednesday with gusts in the 30 to 40 mph range. Isolated thunderstorms brought a mix of wet and dry lightning, though coverage was not widespread. On Thursday, gusty winds are expected to develop again in the afternoon, with the strongest winds across northern Nevada, far southwest Idaho, and the Snake River Plain. Wind speeds will be in the 25 to 35 mph range with locally higher gusts possible. Isolated storms are possible across the higher terrain of central and southern Utah due to moisture trapped below an upper high centered over the Great Basin. Isolated storms are also possible across the Uinta mountains on Thursday.

Gusty winds are expected to develop again on Friday, though the strongest winds will be across the northeastern portion of the Great Basin. As moisture begins to wrap around the upper high on Thursday, isolated thunderstorms are possible across the Sierra and far southern Utah, Nevada, and the Arizona Strip. Hot and dry conditions are expected to continue through Friday across majority of the area. High pressure will remain in place into early next week. There is the potential for moisture to begin to return to the southern part of the area early next week.

Fuels/Fire Potential:

... Fuels and Fire Behavior Advisory in effect for Utah, the Arizona Strip and Southern/Eastern/Central Nevada ...

...Fire potential is on the increase regionwide this week with hot and dry weather returning...

The upcoming warm and dry weather will cause fire danger values to increase once again to near the 90th -97th percentile over much of the Geographic Area this week.

Hold overs from recent lightning may pop up this week as humidity's decrease and winds pick up across the north.

Resources:

Aviation within the Great Basin

- 0 VLAT, 2 LATs, 0 CL-415
- 25 SEATs, 2 FB, 10 AA, 0 ASM, 1 LP
- 1 HLCOs
- 10 Type 1 Helicopters / 9 Comm.
- 5 Type 2 Helicopters / 5 Comm.
- 19 Type 3 Helicopters / 11 Comm.

Crews Committed within the Great Basin

- 10 IHCs / 2 Available / 1 R&R
- 16 Type 2IA / 3 Available / 1 R&R
